Subject: RE: Syn Minor Permit for East Bench CS

Hello Eric,

Thank you for touching base on this application. I have provided comments on your requests below. We should be good to proceed with a permit similar to the White River CS.

Thank you,

Natalie Ohlhausen

Subject: Syn Minor Permit for East Bench CS

Natalie,

I've reviewed the synthetic minor NSR permit application for the East Bench CS and am currently drafting the proposed permit. Other than the absence of dehydrators at this facility, I anticipate the same permit requirements for engines and pneumatics as we proposed in the White River CS permit, which are consistent with the East Bench application and the Consent Decree.

I do have two very minor questions regarding the East Bench application...

1. For descriptive purposes, please confirm the size of the two condensate/produced water tanks. I do not see this in the application. – (1) 300 bbl tank and (1) 400 bbl tank
2. The application makes several references to "Bonzana East". I assume this name is the same facility as "East Bench". Please confirm. – Yes, this seems to have been a copy/paste error and the application should reference East Bench Station only.

Thanks,

Eric
